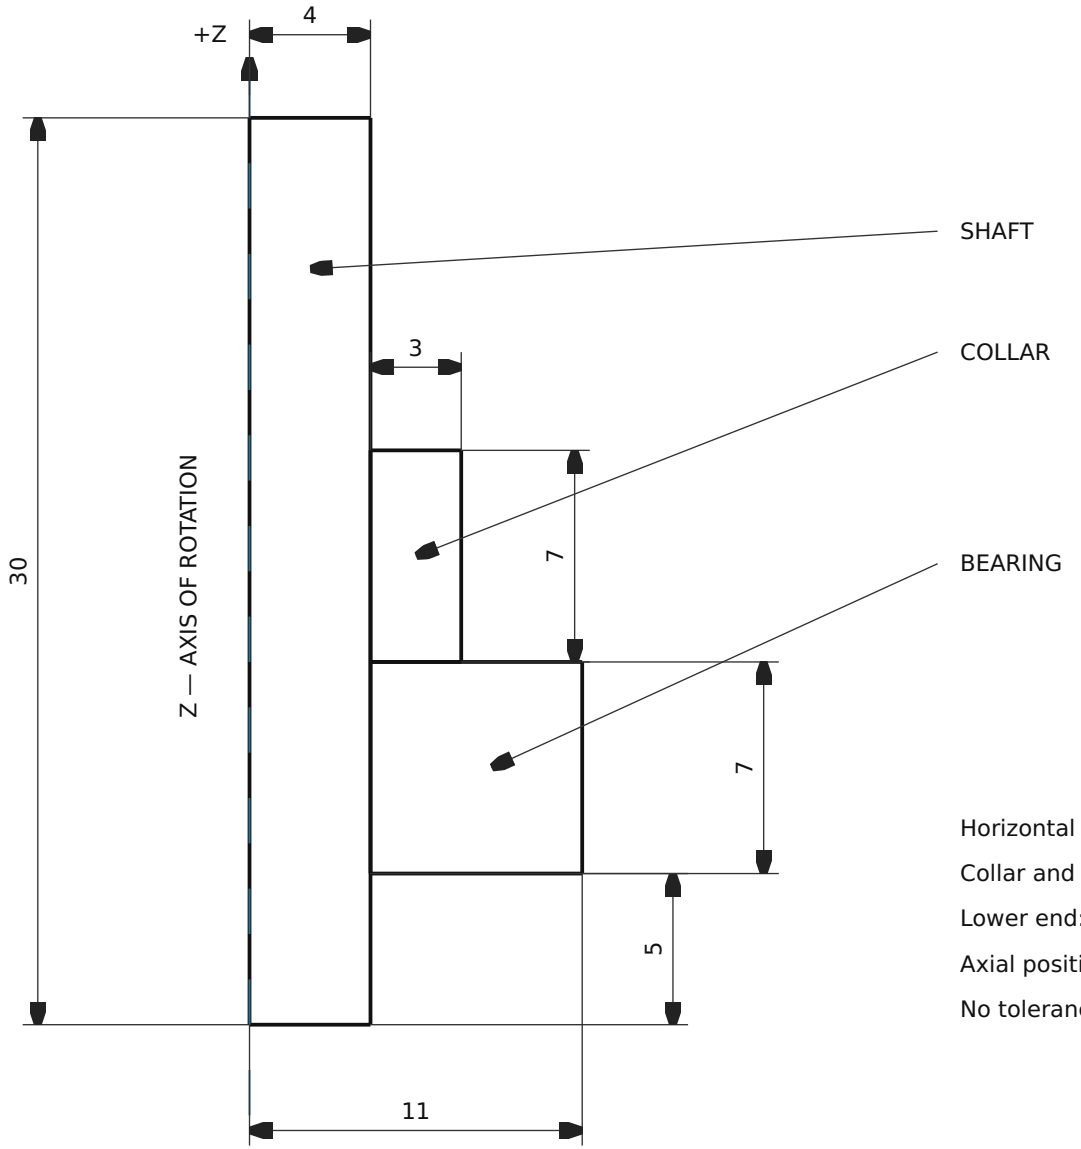
ANEMOMETER / collar+bearing-s

XZ plane • viewed along −Y • positive X half-profile



Horizontal dimensions are radial.

Collar and bearing meet: no axial gap.

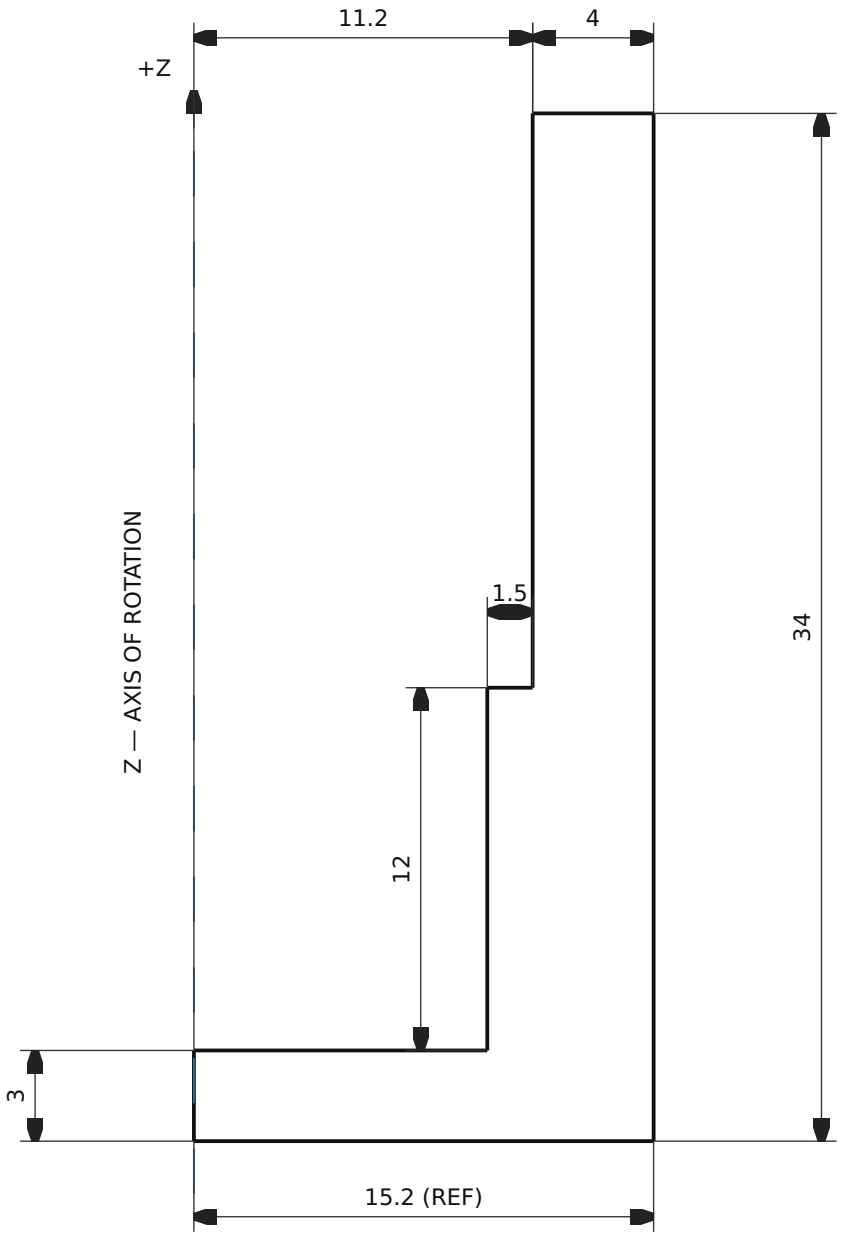
Lower end: Z = 10.351 (REF).

Axial position is unconstrained in source.

No tolerances specified in source.

ANEMOMETER / base-s

XZ plane • viewed along −Y • positive X half-profile



Horizontal dimensions are radial,

not diameters.

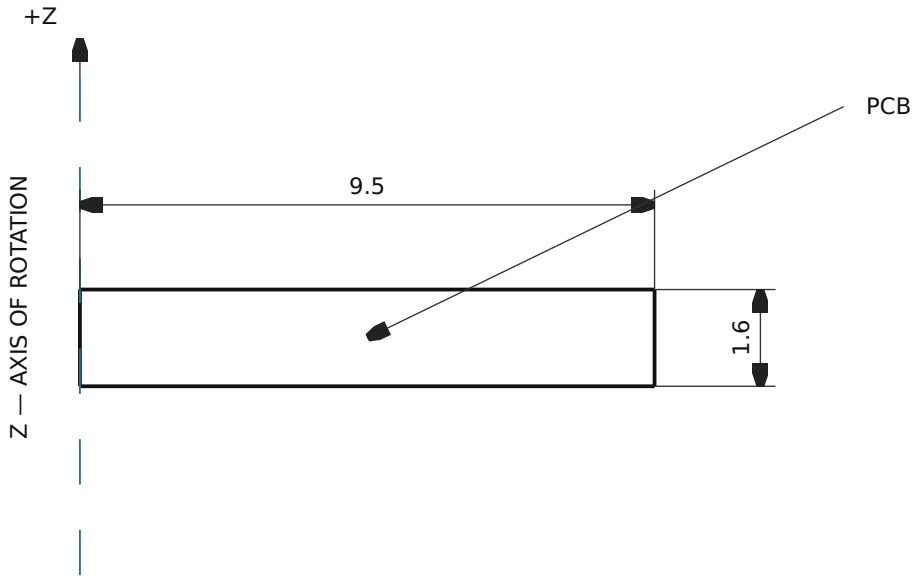
Base lies at Z = 0.

REF = derived/reference dimension.

No tolerances specified in source.

ANEMOMETER / pcb-s

XZ plane • viewed along −Y • positive X half-profile



Horizontal dimension is radial.

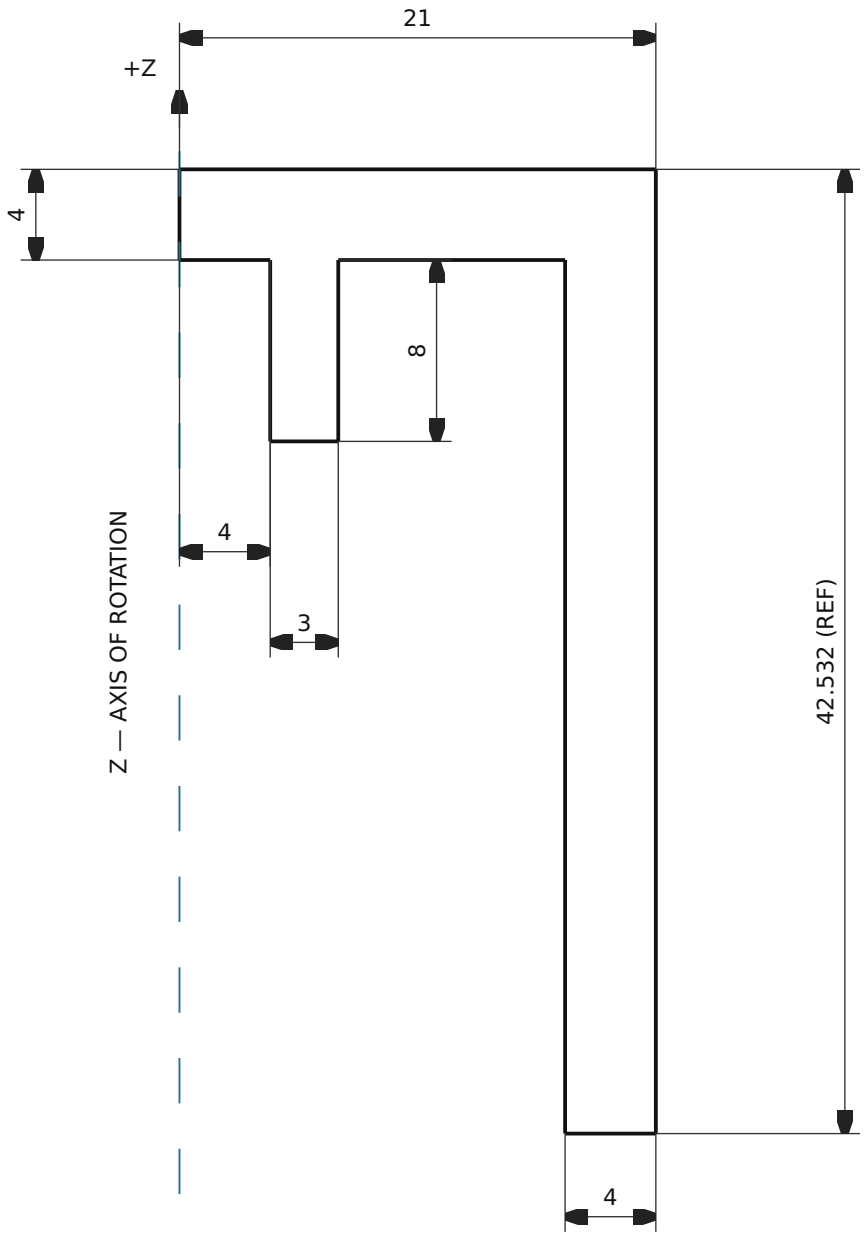
Lower face: Z = 4.108 (REF).

Axial position is unconstrained in source.

No tolerances specified in source.

ANEMOMETER / Sketch003

XZ plane • viewed along −Y • positive X half-profile



Horizontal dimensions are radial.

REF = measured/reference dimension.

Lower end: Z = 2.092 (REF).

Overall height and axial position

are unconstrained in source.

No tolerances specified in source.
