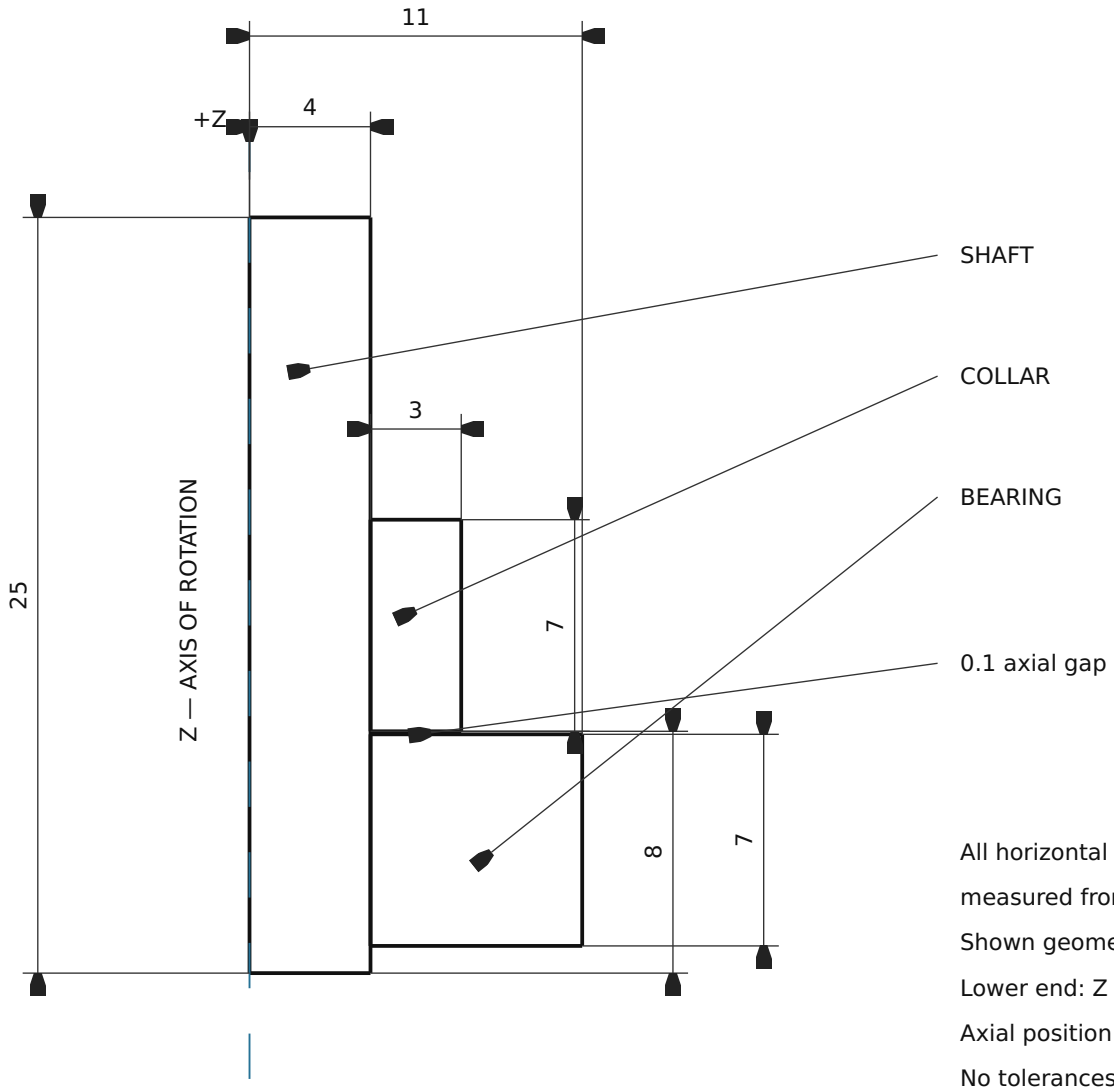
ANEMOMETER / collar+bearing-s

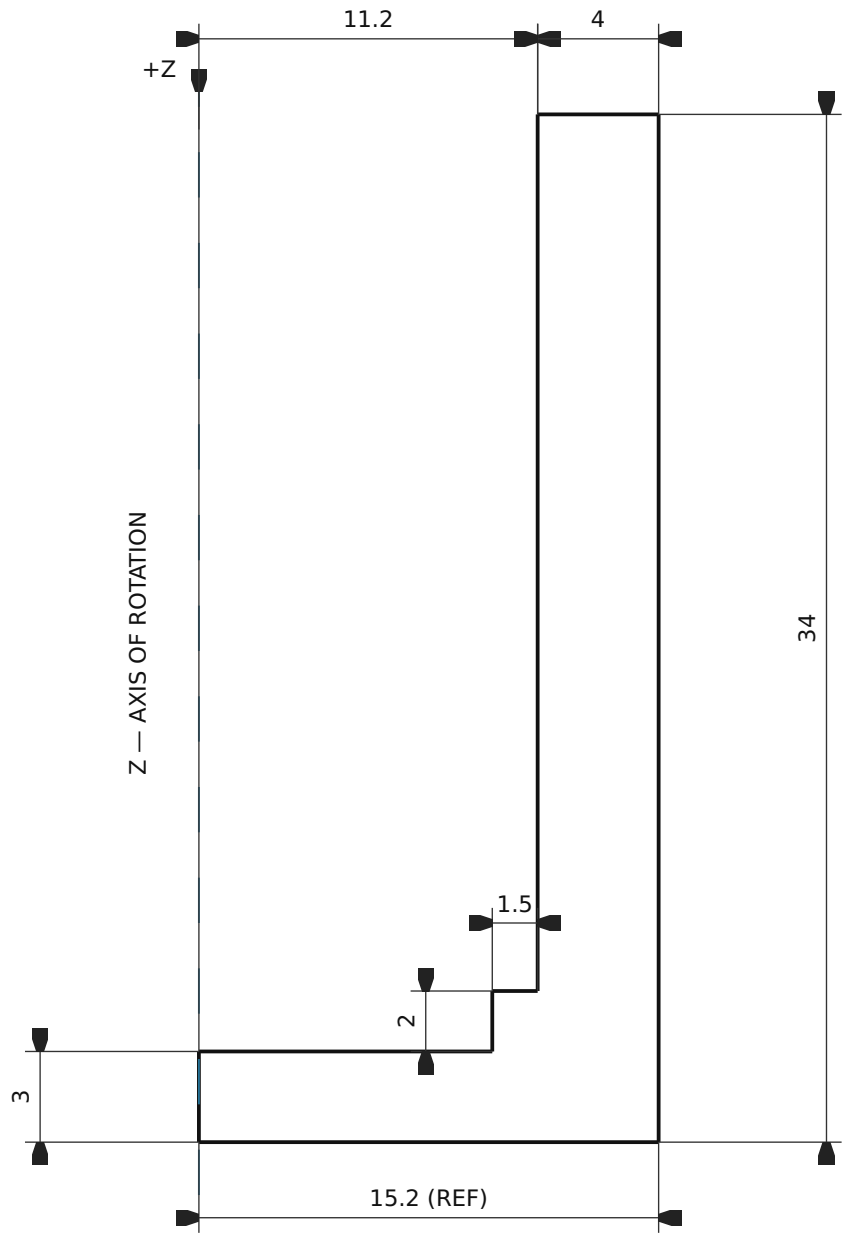
XZ plane • viewed along −Y • positive X half-profile



All horizontal dimensions are radial,
measured from Z or between edges.
Shown geometry only; no solid inferred.
Lower end: Z = 18.049 (REF).
Axial position is unconstrained in source.
No tolerances specified in source.

ANEMOMETER / hub-s

XZ plane • viewed along −Y • positive X half-profile



All horizontal dimensions are radial,

not diameters.

Base lies at Z = 0.

REF = derived/reference dimension.

No tolerances specified in source.
